Professional Summary

Junior Full Stack Developer with hands-on industry experience building responsive, scalable web applications using React.js, Next.js, Node.js, Express.js, MongoDB, PHP, and MySQL. Currently contributing at Cyber Design India Pvt. Ltd., with prior experience gained through a 4-month Full Stack Development internship at Milople Technologies. Proven ability to design and develop REST APIs, authentication systems, CRUD operations, and database integrations. Strong command of JavaScript ES6+, HTML5, CSS3, and Git, with a track record of writing clean, maintainable code. Passionate about problem solving, collaborative development, and continuous learning of modern web technologies.

Technical Skills

- **Programming Languages:** JavaScript (ES6+), TypeScript, PHP, Python
- **Frontend:** HTML5, CSS3, Bootstrap, React.js, Next.js
- **Backend:** Node.js, Express.js
- **Databases:** MongoDB, MySQL
- **Tools & Technologies:** Git, GitHub, VS Code, Postman, RESTful APIs, JWT Authentication
- **Core Concepts:** Full Stack Development, CRUD Operations, API Integration, Responsive Web Design, Authentication & Authorization, State Management, Database Design, MVC Architecture
- **Soft Skills:** Problem Solving, Team Collaboration, Effective Communication, Adaptability, Time Management

Work Experience

Cyber Design India Pvt.Ltd

September 2025 – Present

Junior Full Stack Developer

- Developed and maintained responsive web applications using React.js, Node.js, Express.js, and MongoDB, improving page load efficiency and overall user experience.
- Designed and implemented RESTful APIs to support core application features, enabling seamless data exchange between frontend and backend systems.
- Implemented secure authentication and authorization workflows using JWT, protecting user data and restricting access to authorized roles.
- Built and optimized CRUD functionality across multiple modules, streamlining data management for end users.
- Integrated frontend components with backend APIs, ensuring consistent data flow and reducing integration-related bugs by identifying issues early.
- Optimized application performance through code refactoring and efficient database queries, reducing response times.
- Identified and resolved bugs while enhancing UI/UX, contributing to a smoother and more intuitive user interface.
- Collaborated with cross-functional team members using Git for version control, ensuring smooth code integration and minimal merge conflicts.
- Followed clean coding practices and adhered to MVC architecture, improving code readability and maintainability.

Milople Technologies

March 2025 – July 2025

Full Stack Developer Intern

- Built dynamic, responsive user interfaces using React.js, translating design requirements into functional components.
- Developed backend RESTful APIs using Node.js and Express.js to support application functionality and data processing.
- Worked extensively with MongoDB for database design, queries, and data modeling to support application requirements.
- Implemented CRUD operations across application modules, ensuring reliable data creation, retrieval, updates, and deletion.
- Identified and resolved bugs across the application stack, improving overall stability and performance.
- Collaborated closely with the development team in an agile environment, participating in code reviews and feature planning.
- Built responsive web pages optimized for usability across multiple screen sizes and devices.

- Assisted in developing and testing web pages using HTML, CSS, and JavaScript under senior developer guidance.
- Gained hands-on exposure to web development workflows, debugging techniques, and Git version control.
- Supported UI improvements and resolved minor functional issues in existing web pages.

Projects

Task Management System

Next.js, React.js, Node.js, Express.js, MongoDB, Tailwind CSS, REST API

April 2025 – July 2025

- Built a full-featured, responsive task management web application enabling users to create, organize, and track tasks efficiently.
- Implemented secure user authentication to protect user accounts and personalize task data.
- Developed complete CRUD functionality, allowing users to create, update, and delete tasks seamlessly.
- Designed task status management (To Do, In Progress, Done) to streamline workflow visibility and progress tracking.
- Added filtering and priority management features, improving task organization and user productivity.
- Integrated REST APIs and leveraged Next.js features such as server-side rendering to optimize application performance.

BookMyDoc – Doctor Appointment Booking System

React.js, Node.js, Express.js, MongoDB

January 2025 – April 2025

- Developed a full-stack doctor appointment booking platform connecting patients with healthcare providers.
- Implemented secure authentication for both doctors and patients, ensuring role-based access control.
- Built an online appointment booking system allowing patients to schedule, reschedule, and cancel appointments.
- Designed dedicated doctor and patient dashboards for managing appointments, schedules, and medical interactions.
- Integrated appointment notifications and secure payment processing, improving platform reliability and user trust.

Up Gadgets – E-Commerce Platform

PHP, MySQL, Bootstrap, JavaScript

March 2025 – April 2025

- Built a full-featured e-commerce website for electronics, supporting end-to-end product browsing and purchasing.
- Implemented user authentication and account management for secure customer access.
- Developed product management functionality, allowing efficient addition, editing, and categorization of listings.
- Built shopping cart and checkout systems, enabling a smooth and reliable purchasing experience.
- Designed an admin dashboard for managing orders, products, and overall store operations.

Online Food Ordering System

PHP, MySQL, HTML, CSS, JavaScript, Bootstrap

December 2022 – April 2023

- Developed a complete online food ordering platform with customer authentication and account management.
- Built menu management and cart functionality, enabling customers to browse and order food items easily.
- Implemented order tracking and payment integration to support seamless end-to-end ordering.
- Designed an admin panel for managing menu items, orders, and overall platform operations.

Education

Master of Computer Applications (MCA)	2023 – 2025
Gyanmanjari Innovative University	CGPA: 7.689
Bachelor of Computer Applications (BCA)	2020 – 2023
Shree Swaminarayan College of Computer Science (SSCCS)	Percentage: 66.49%
